PROFILE

Full-stack web developer based in Lagos, Nigeria, with 4+ years of experience building web applications, REST APIs and fintech platforms with Laravel, Node.js and React. Delivered client websites, e-commerce platforms, a VTU bill-payment system with secure payment integration, and a SaaS product-research platform. Focused on clean, maintainable backend systems and fast, user-friendly interfaces, and on delivering projects on time and to client specification.

TECHNICAL SKILLS

Backend	PHP, Laravel, Node.js, Python, REST API design, API integration, SQL, Redis, web scraping
Frontend	React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
Integrations & Tools	Paystack, Clerk, Git, GitHub

EXPERIENCE

Full-Stack Web Developer 2022 – Present
Freelance | Lagos, Nigeria

- Design and build responsive websites and web applications for clients, managing the full cycle from planning to deployment and delivering on time and within budget.
- Develop secure REST APIs with Laravel and Node.js, and integrate payment gateways, authentication systems and third-party services.
- Built e-commerce platforms with intuitive interfaces to drive customer engagement.
- Developed VTU systems for utility bill payments, featuring secure payment integration and reliable transaction handling.
- Built Sales-Spy, a SaaS product-research platform powered by hybrid web scraping, and the EbestVTU bill-payment platform (see Selected Projects).

SELECTED PROJECTS

Sales-Spy – SaaS Product Research Platform sales-spy.netlify.app

- Helps dropshipping entrepreneurs discover trending, high-demand products across Wix, Etsy, Shopify and WooCommerce using a hybrid scraping approach for accurate, real-time insights.

EbestVTU – VTU & Bill Payment Platform ebestvtu.com.ng

- Website for paying utility bills: data subscriptions, TV bills, electricity bills and airtime recharge, with secure payment integration and efficient transaction handling.

EDUCATION

Certificate in Web Development 2022
Chrisgate Computer College

- Coursework in HTML, CSS, JavaScript, Bootstrap and backend integration (PHP, SQL and API integration).

INTERESTS

Emerging web technologies, open-source contribution, Web3 and decentralized applications.
